

MIMO LTE / MIMO WiFi/ GPS, Glonass, Beidou Combo Antenna

MODEL: AW-10T-DLW ✓RoHS

MIMO LTE+MIMO 2.4-5.0GHz+GNSS

*White Radome Available

Overview:

The **AW-10T-DLW** is a multi-band antenna, which covers the following bands:

- GPS L1 Band-1575.42MHz / Glonass 1602MHz / Beidou 1561MHz (1 cable)
- LTE 700~2700MHz (2 Cables)
- Wifi 2400~2500MHz / 5150~5850MHz (2 Cables)

It is specially designed for any telemetry applications, which utilize those bands.

The high sensitivity of **AW-10T-DLW** will enhance the performance and connectivity of your telemetry devices.

Features:

1. Heavy-duty low profile compact structure
2. Screws mount, IP67 Fully waterproof
3. Covers all the mobile communication network

Applications:

1. Vehicle tracking
2. GPS Navigation
3. Telemetry Application
4. Transportation and remote monitoring
